

Library Books Management (C++ Program)

Source Code

```
#include <iostream>
using namespace std;

int main()
{
    int id1, id2, id3;
    string title1, title2, title3;

    cout << "Enter Book 1 ID: ";
    cin >> id1;

    cout << "Enter Book 1 Title: ";
    cin >> title1;

    cout << "Enter Book 2 ID: ";
    cin >> id2;

    cout << "Enter Book 2 Title: ";
    cin >> title2;

    cout << "Enter Book 3 ID: ";
    cin >> id3;

    cout << "Enter Book 3 Title: ";
    cin >> title3;

    cout << "
===== LIBRARY BOOKS =====";

    cout << "
Book ID: " << id1;
    cout << "
Book Title: " << title1;

    cout << "

Book ID: " << id2;
    cout << "
Book Title: " << title2;
```

```
    cout << "  
  
Book ID: " << id3;  
    cout << "  
Book Title: " << title3;  
  
    return 0;  
}
```
